

# BUILDING HOPE

CAPITAL CAMPAIGN

# **BUILDING HOPE** IN VIENNA, AUSTRIA

The International Christian School of Vienna (ICSV) was founded over thirty years ago by families who desired a Christian education for their children in English. Today, ICSV is still the only K-12 English-speaking Christian school in Vienna.

ICSV provides high-quality, individualized education, equipping students with Christian character to impact the nations of the world.

**OUR MISSION**

An international school of choice where every student is valued and empowered with truth and knowledge for life.

OUR VISION

# CAPITAL CAMPUS BUILDING

# CAMPAIGN FOR BIG HOPE

The International Christian School of Vienna was established in 1985 to meet the educational needs of missionary families in Central Europe. It soon expanded its vision to impact the nations through Christian education by enrolling children from all cultural and faith backgrounds.

Today, ICSV has reached full capacity in the current facility and is forced to turn away students. Families are looking for a caring and safe learning environment where their children can thrive. At ICSV, students encounter a culture of acceptance and love. They experience education as valued individuals who are challenged academically, while receiving the support that they need to succeed.

*“much more  
than just a  
new building”*

The Building Hope project is much more than just a new building. It is an opportunity for you to partner with us to extend hope to more families. The completion of the building project will enable us to provide quality Christian education for up to 600 students in a facility that is designed with the learner in mind.

Christian  
School of  
Vienna*

## **BUILD IN**

Effective teachers have a direct influence on the students' overall school experience and, in particular, their academic achievement. ICSV is committed to fostering a culture of continual personal improvement, allowing teachers to enhance student instruction while striving for excellence in the academic program.

## **BUILD UP**

The systematic application of the latest research-based knowledge to enhance student learning is key to providing students with a high quality, individualized education. ICSV is committed to building up its students through the intentional and effective use of standardized assessments and by fostering a caring community and culture of excellence.

## **BUILD OUT**

Facilities that are strategically developed with the learner in mind help enhance student achievement, improve student behavior, and increase student engagement. ICSV is committed to making fiscally responsible decisions to expand and improve the school's facilities and operating systems in order to provide the resources needed to achieve excellence in all areas of the school's programming.

# IMPACTING THE NATIONS OF THE WORLD

ICSV is a place where the nations of the world come to us. We are a school where students can grow academically, socially, and spiritually. We are a community that appreciates the world's cultures and celebrates our unique student body.

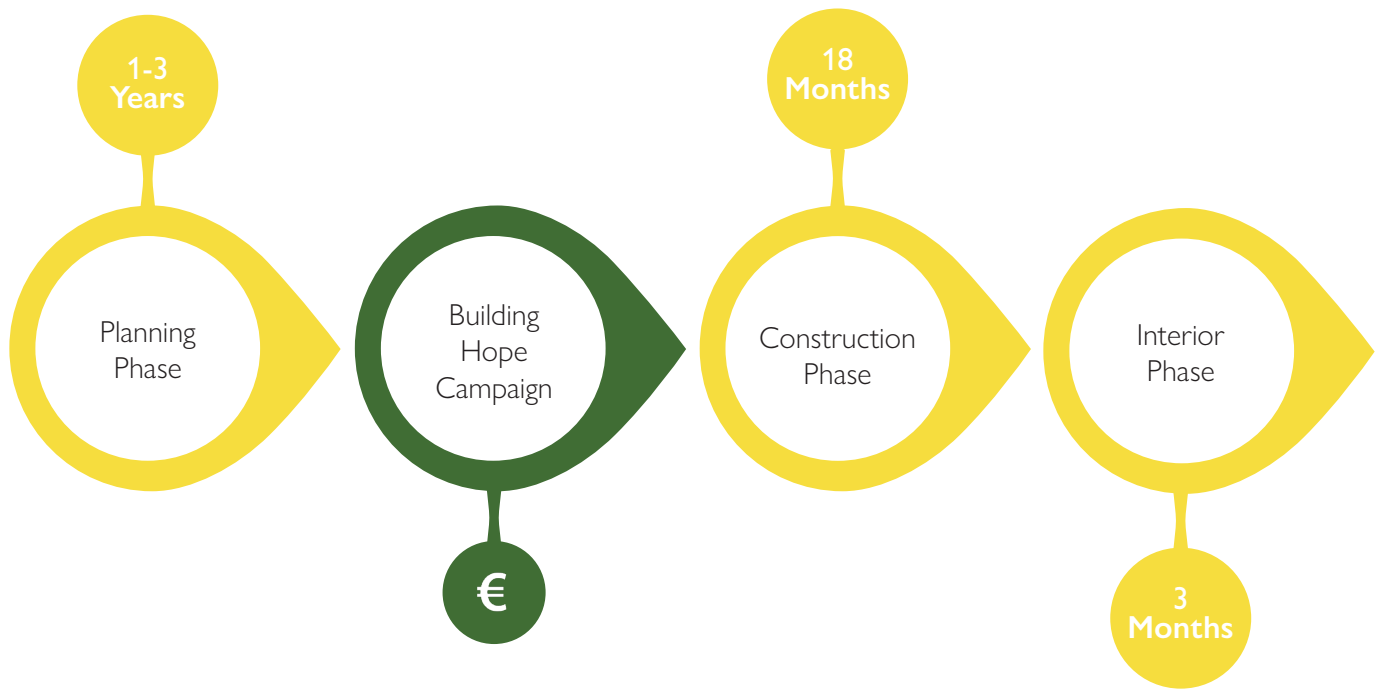

For over 30 years, ICSV has been educating students in facilities that were not designed for education. In fact, our current building was built as a porcelain factory. Our classrooms are too small, the science labs lack proper equipment, and there is no gymnasium or auditorium. In addition, we have reached maximum enrollment capacity.

ICSV now has the opportunity to build a student-centered school. We are seeking to partner with individuals, foundations, ministry organizations, churches, and other entities to raise the initial capital of five million Euros that will enable the school to begin construction. The total cost of the Building Hope project is estimated at 32 million Euros.

# BUILDING FOR THE FUTURE

**Learner Centered Facility**  
Design collaborative and creative learning spaces for up to 600 students.

**Student Support Services**  
Expand Student Support Services to provide individualized instruction for non-native English speakers and students with learning challenges.

**Labs & Makerspaces**  
Build state-of-the-art laboratories for science, engineering, technology, and creative art spaces.

**Auditorium**  
Provide designated space for drama productions, concerts, chapel events, and school assemblies.

**Athletics**  
Offer a gymnasium and outdoor sports area that accommodate and enhance the physical education and athletic programs.

**Gospel**  
Create opportunities to share the hope of Jesus Christ with children and their families from all over the world.

# BUILDING MEANINGFUL FUTURES TOGETHER

---

You can be part of this incredible story! We invite you to join us in the exciting ministry of providing Christian education to students from all different faith backgrounds and cultures. Your gift will make it possible for us to impact the lives of students and extend hope to even more families.
